**DETAILED ACTION** 

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Gutoff (US 4,275,587). Gutoff discloses the claimed invention, a method and system for determining wettability of a substrate coated with a particulate gelatin coating. Gelatin consists of particulate colloid material. The coated substrate is inserted into a test liquid forming a liquid meniscus which is optically analyzed to determine the meniscus height and therefrom to calculate the wettability of the surface. The test device has many cylindrical surfaces (Figure 1); in particular, the measurement surface is forced into a partially cylindrical shape when interacting with cylinders 11 and 12. See abstract, column 3, column 6, and column 10 lines 23-29.

# Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Application/Control Number: 10/786,991

Art Unit: 2855

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gutoff (US 4,275,587) in view of Fukunaga (US 5,815,256). Gutoff teaches the claimed invention except for optical meniscus profiling. Fukunaga teaches optical meniscus profiling to determine the wettability of an immersed substrate; see Figures 4-8, 12, 15, 16, column 9, and columns 15-16. It would have been obvious to use profiling as taught by Fukunaga in the invention taught by Gutoff to analyze the meniscus, since this is shown to present a fuller depiction of the wettability of the entire substrate area.

## Allowable Subject Matter

Claims 9-14 are allowed.

Claims 5 and 8 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims, because the prior art does not teach or fairly

Art Unit: 2855

suggest a layer of adhesive material bonding a particulate to a substrate in the claimed method and apparatus.

## Response to Arguments

Applicant's arguments with respect to claims 1-4, 6, and 7 have been considered but are most in view of the new ground(s) of rejection.

### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
